SoooGuard INC
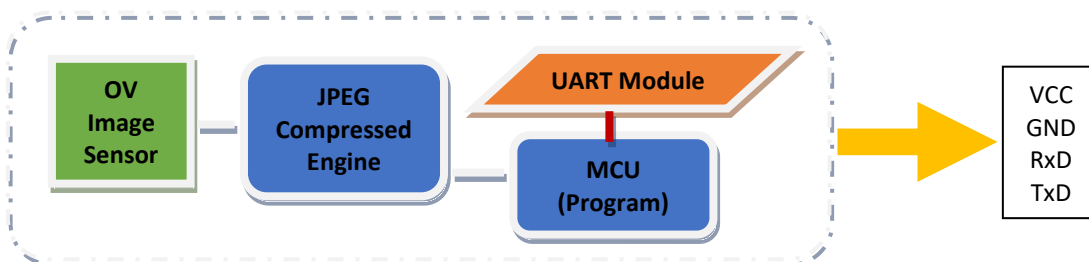

JPEG Compression
Dome VGA Camera
UART Serial Interface

General Description

The TVBD030 is a high integrated indoor dome camera that performs as a JPEG compressed still camera, which also provides a standard UART port for communication. Users can request a full pixel dimension single-frame still picture by sending out a snapshot command from host. The picture is then compressed by the JPEG engine and transferred to the host via UART port.

Application

It supports Standard RS-232 / RS-485 / TTL interface. Now it is widely used Vehicle GPS tracking system, Robert Vision System, Industrial Process Control, Safety Protection etc.;

Features

- **Cost Effective:** Low-cost & low-powered solution for a image acquisition system;
- **Various Pixel Dimension:** VGA / QVGA / QQVGA for different requirements;
- **Low Image Data:** JPEG compressed with 4-compression ratio configuration;
- **Multiple UART Ports:** RS-232, RS-485, TTL for different hosts;
- **Different Baud Rate:** Support Max 115200bps;
- **Application Environment:** Daytime Mode or Day / Night Mode;
- **Various Lens Option:** 2.8mm/3.6mm

Packing list

- Camera   1
- Self-Drilling Screw   3
- Certificate of Approval   1

Command Summary

No.	Function	Description
1	Snapshot	Request camera to snapshot a specific size picture & divide it into packages.
2	Report	Camera report picture size & number of packages of the snapshot to host deice
3	Get Picture	Host device sends to get the specified picture data package
4	Send Picture	Camera transmits the specified data package to host device
5	Change ID No.	The host sends this command to change the camera ID NO..
6	Alter Compression Rate	Host sends this to set new picture compression rate to adjust picture quality.
7	Change Baud Rate	Setting a new Baud Rate for Camera
